
NET INSTALLATION *(no tools required)*

* Feed the swaged end of the cable through the non winder post cap and onto the internal post hook.
* Feed the non swaged cable end through the winder post cap and into the hole in the drum gear (no need to cut excess cable off).
* Tension the cable by hand pulling so there is minimum cable to wind around the drum.
* Turn the handle to take up the cable tension. The drum will only need a few revolutions to tension the cable.
