**Fortress Goal**

- International standard  
The Fortress hockey goal is an international standard goal complying to FIH regulations and features a unique unobtrusive net support frame.

- \* Unique support frame reduces net sag and allows more room inside the goal. The horizontal frame is less obtrusive than vertical end panel frames.
- \* 4mm tapered woven polypropylene net.
- \* 75 x 50mm section thick wall aluminium uprights and cross bar to withstand ball impact.
- \* Net attachment rods along the goal mouth and boards.
- \* Synthetic grass board lining to reduce noise and ball impact.
- \* Rear board is internally weighted to prevent movement from player impact.
- \* Aluminium box section side boards are welded to the uprights.
- \* Rear wheels for easy movement.
- \* Australian made.
- \* Choice of frame colours.

1. Synthetic grass lining.
2. Rail net attachment.
3. Net support frame at top of goal makes a neater appearance and reduces net sag.
4. rear wheels.
