

NET INSTALLATION *(no tools required)*

- * Feed the swaged end of the cable through the non winder post cap and onto the internal post hook.
- * Feed the non swaged cable end through the winder post cap and into the hole in the drum gear (no need to cut excess cable off).
- * Tension the cable by hand pulling so there is minimum cable to wind around the drum.
- * Turn the handle to take up the cable tension. The drum will only need a few revolutions to tension the cable.

COMPONENTS

QTY	ITEM
1	NON WINDER POST
